

Tofu Ling Math Activity

Counting, Adding, and Subtracting the Tofu Ling Family

Find the following page in the book and solve the story problems:

1. Count and write the number of mice gathering grain. _____
2. When Tofu arrives in the field, write the number of mice now in the field. _____
3. Three of the mice take their baskets of grain home to mama; write the number of mice left. _____
4. Papa brings five baskets to the front of the field and sets them down by four other baskets; write the number of baskets ready to take back to their house. _____
5. Mama and three mice return to the field with empty baskets; write the number of mice in the field gathering grain. _____
6. When Mama and all of the mice are in the field how many baskets would each mouse have to fill so that they would have 22 baskets to take home. _____

(An easy way to solve problem number 6 is to draw a circle to represent each of the 11 mice. Then, draw a small basket in front of each mouse. Once each of the mice has one basket, draw another basket in front of each mouse again and then count the total number of baskets. You will be able to see how the 22 baskets are divided among the 11 mice.)

Now solve these addition and subtraction problems:

$$\begin{array}{r} 9 \\ + 1 \\ \hline \end{array}$$

$$\begin{array}{r} 10 \\ - 3 \\ \hline \end{array}$$

$$\begin{array}{r} 7 \\ + 4 \\ \hline \end{array}$$

$$\begin{array}{r} 5 \\ + 4 \\ \hline \end{array}$$

$$\begin{array}{r} \text{Bonus} \quad 11 \\ + 11 \\ \hline \end{array}$$
