

Learning to Use a Grid

Learning to use a grid will help you to locate a place on a map. To locate a grid square first go across from left to right (A,B, and C) and then go down (1,2,and 3). When you have completed this activity, locate grid markings on a city, state, or United States map. Then, find locations based on their grid location.

	A	B	C
1			
2			
3			

Draw the following shapes in the squares on the grid above: a sun in A1, a butterfly in B2, clouds in C1, a pond that is large enough to fit in A3 and B3, and a tree in C2. Now it is your turn to decide where to draw the following objects. Then, identify the location of the object next to the name.

Tofu Ling _____ Flowers _____ Swan _____

Bonus: Create your object _____ and record its' location _____.
